# Overview

# Business Objectives

Our audience is some health institutions, or some health research centers. They can use our EDA report to select the attribute in their experiments. As for our purpose of the dashboard. We will find the relationship between heart disease and other attributes. Which attribute will have a greater impact, and the impact of different attribute combinations on heart disease.

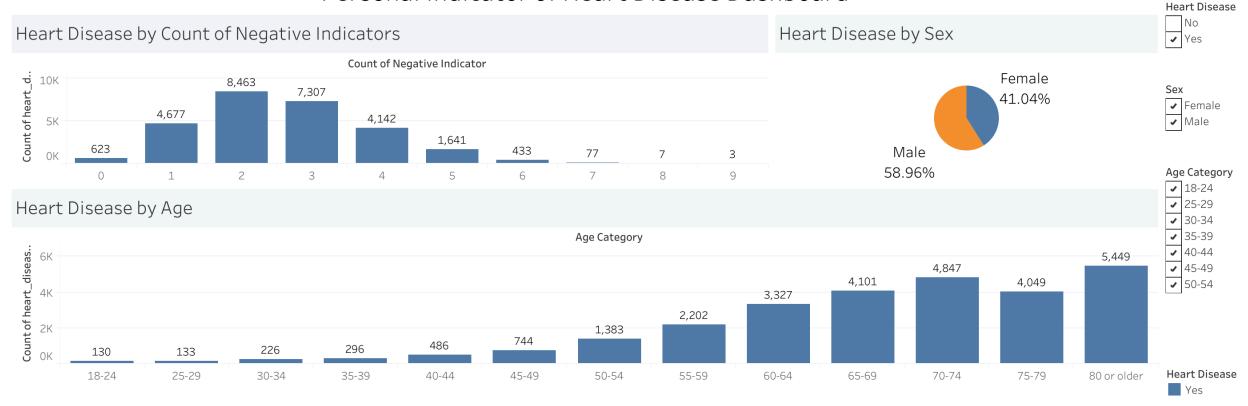

# Data Source

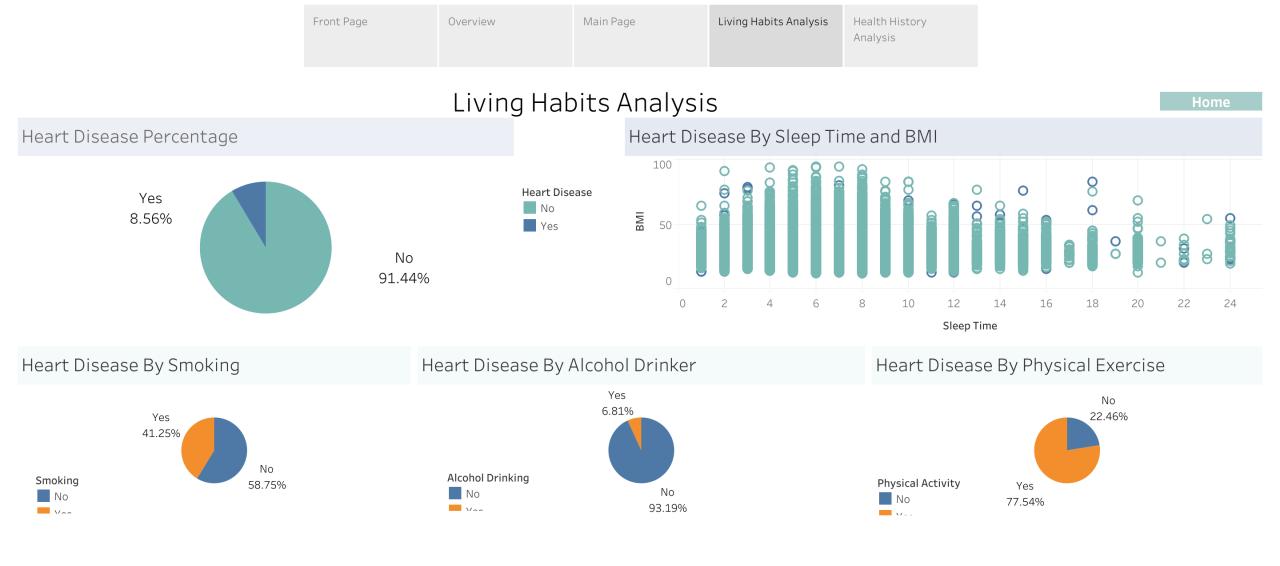

Personal Key Indicators of Heart Disease: 2020 annual CDC survey data of 400k adults related to their health status
